Viasat: Space for Good

Formerly known as Viasat: Beyond Space

A STEM innovation challenge

Overview

Viasat has partnered with Springpod to bring a unique and engaging challenge to university students in the United States. You'll explore what it takes to address improving life on Earth through sustainable space technologies. If successful, you could even pitch your idea to industry experts themselves!

U.S. university level

Thousands of STEM students will have the opportunity to engage with our content-rich educational platform while competing through three phases of competition. The finalists will receive professional mentorship, an all-expenses paid trip to Viasat Corporate Headquarters in Carlsbad, CA and an opportunity to win the first place education grant of \$15,000!

What's involved?

- Learn about the opportunities and challenges in the space industry through our platform and webinars.
- Submit your original ideas in response to a prompt.
- Expand upon your idea using a digital medium.
- With the help of Viasat mentors, bring your idea to life in a presentation to industry experts.

Visit viasat.springpod.com to learn more and register for the challenge.

Terms and conditions apply.

About Viasat

Viasat is a global satellite communications company that believes everyone and everything in the world can be connected. Viasat is developing the ultimate global communications network to power high-quality, reliable, secure, affordable, fast connections to positively impact people's lives anywhere they are—on the ground, in the air or at sea, while building a sustainable future in space. For more information, visit viasat.com.
